
L0
Conceptual argument
Mission need
Proposed mechanism
Claim and rationale
L1
Analytical/security reasoning
Assumptions and model
Derivation or security analysis
Property under assumptions
L2
Simulation or recorded data
Simulation or recorded data
Evaluation protocol
Measured outcomes
L3
Prototype or testbed
Implemented system
Controlled workload
Observed behavior
L4
Physical operating trial
Platform and environment
Test in operating conditions
Observed outcomes
L5
Sustained multi-party operation
Multi-party operation
Failures and recovery
Longitudinal evidence
Assess each supported claim
Rigor and uncertainty
Environmental fit
Scope and duration
